## **ROTO PAC® - SIDE LOADER**

The next step in waste collection comes in the form of the revolutionary ROTO PAC® system. Based around an auger that pushes waste from the collection hopper into the compaction chamber, the ROTO PAC® makes it easy to change from standard waste to FOGO waste, thus eliminating the need for separate vehicles.

The auger configuration at the heart of the ROTO PAC® system is able to move waste into the compaction chamber three times faster than the conventional “pack panel” design. This is a far more efficient way in which to compact the waste and it allows for more time on the collection routes and less time travelling to and from the refuse tipping facility.

## **HEALTH AND SAFETY FEATURES**

- Fire extinguishers
- 3rd party camera systems and DVR recording
- Custom engineered solutions
- Lighting (work lights, revolving beacons)
- Optional lift-zone monitoring
- Optional reverse monitoring
- Optional cyclist monitoring

## **QUALITY SERVICE AND TRAINING**

We're known for fast, quality service and have the infrastructure to place our team and vehicles where they're needed. We provide the best after-sales support within the industry, and our nationwide network provides global expertise on a local scale. Our units are also tracked by GPS, which allows us to anticipate servicing needs in real-time.

We carry a full range of spare parts and offer repair and maintenance packages at competitive rates. With dedicated service centres and STG partners available to service you Australia-wide.

We provide comprehensive training to help you operate and maintain your truck correctly and get the most out of our state-of-the-art technology. We also offer on-demand refresher training programs.
