STG GLOBAL

THE TUSK - FRONT LOADER

When you've got a lot of waste to collect, the Tusk Front-loader is the beast to have. The Tusk is built for the big jobs and the heavy, industrial collection routes. With an impressive 2'500 KG lift capability.

With a body capable of holding between 28m³ and 33.5m³, the Tusk is built to take big loads and minimise the number of times your drivers need to empty. This impressive capacity means that less fuel is expended in driving back to the disposal facility and the machine can stay on the job for longer.

Add to that the 6x4 or 8x4 wheel configurations and you can use the Tusk in almost any location and on any kind of terrain: an important consideration given Australia's often rough and isolated roads and long distances.

HEALTH AND SAFETY FEATURES

- Fire extinguishers
- 3rd party camera systems and DVR recording
- Custom engineered solutions
- Lighting (work lights, revolving beacons) integrated
- Storage toolboxes
- In cab and body E-stops
- Animated turn signals
- Hydraulic safety burst valves
- Safety interlock
- Optional lift-zone monitoring
- Optional reverse monitoring
- Optional cyclist monitoring

QUALITY SERVICE AND TRAINING

We're known for fast, quality service and have the infrastructure to place our team and vehicles where they're needed. We provide the best after-sales support within the industry, and our nationwide network provides global expertise on a local scale. Our units are also tracked by GPS, which allows us to anticipate servicing needs in real-time.

We carry a full range of spare parts and offer repair and maintenance packages at competitive rates. With dedicated service centres and STG partners available to service you Australia-wide.

We provide comprehensive training to help you operate and maintain your truck correctly and get the most out of our state-of-the-art technology. We also offer on-demand refresher training programs.
